

# Future Audit™

Future Audit 3.0™ (FA3™), from AuSuM Systems™, is a comprehensive database-driven auditing tool, designed specifically for use by field staff. The application installs on any Windows-based laptop/notebook computer, aiding field staff to complete detailed premium audits onsite - faster and easier than ever before.

With FA3™, all necessary documents and support materials are right where your field staff need them - at their fingertips. FA3™ streamlines the entire field process, saving time and minimizing errors; allowing your field staff to be focused on the most critical aspect of auditing - job and operation classifications - instead of the mundane tasks of recording, summarizing, and documenting.

## Once you compare, the difference is AUSUM.

### Comprehensive Tools for Field Staff

- Progress Reporting
- Centrally managed checklist to ensure audit meets business rules
- Exit interview including signature of insured
- Auto notes feature quickly points out issues with audits
- Complete Scheduling including Synchronization with Outlook
