

# Ashley™

## Automated Survey Handler

Ashley™ (Automated Survey Handler™), from AuSUM Systems™, is an automated Safety Inspection and Risk Management Survey tool designed for use in the field and to interface with sister-software, SARA™ (Survey and Risk Management™). The application installs on any Windows-based laptop, handheld, or wireless computer; aiding field personnel in completing detailed loss management reports onsite – faster and easier than ever before.

Ashley™ expertly guides users through each step of the inspection process, and provides all the forms and supporting documentation necessary to complete surveys onsite. And when working together with her sister-software SARA™, Ashley™ offers a turnkey, fully automated and paperless system for managing any loss management or safety inspection situation.

Each aspect of Ashley™ has been designed to help streamline the field process and make conducting surveys as efficient as possible – from attaching photos and diagrams to spell checking text entries. Ashley™ even features an advanced completion logic that preselects key risk improvements based on approved criteria and classifications.

Below is a list of key features in Ashley™ that help field staff focus on their job...not the management of their job.

## Once you compare, the difference is AUSUM.

### State-of-the-Art Technology

- Complete data synchronization so you are not bound by WiFi and cell coverage
- Integration with digital cameras
- Collect latitude and longitude values with a click. Use these to calculate distance
- Computers that are sealed, waterproof, and tough enough for the roughest environments
- Lightweight and easy to carry
- Never lose your data with quick backup utilities
- Straps over your shoulder to free your hands during inspections

#### Benefit

Collect the information they need wherever they need to collect it.

### Work Product Features

- Automatic work product selection based on survey/inspection properties
- Automatic calculation of key computations
- Tabulate scoring as work product is complete
- Automatically integrate and categorize Risk Improvements
- Annotate photos
- Narrative text using the word editor
- Automatic creation of charts and graphs based on work product
- Integration of tips to guide field staff to potential problems quickly

#### Benefit

Allows for the completion of work product in an easy-to-use interface that field staff will adapt to quickly and efficiently.

### Comprehensive Tools for Field Staff

- Progress Reporting
- Complete Scheduling and Sync with Outlook
- Auto Scheduler
- Mapping and Geocoding
- Handheld and wireless collection of data
- Add and annotate photos and sketches
- Easy to use work product completion tools
- Time tracking and utilization goals
- Distribution options to determine the delivery and method for all items

#### Benefit

Allows field staff to collect data using intuitive tools that allows them to focus on their job, not the process.

### Real Time. Real Tracking. Real Smart.
